## THE CURRENT LIST OF MEDICAL LITERATURE

Beginning with Volume 15, a number of changes appear in the list of "Subject Groups According To Journals" printed on the front cover of the CURRENT LIST. Several new groups have been added (Allergy; Anaesthesia; Geriatrics); several of those formerly used have been abandoned (Archaeology; Zoology); while still others have been regrouped or renamed (e. g., Dietetics; Food Nutrition is now Nutrition; Bone, Joint, Extremities, Muscle has become Musculoskeletal System; etc.). Other changes not cited here may be noted by referring to the list of subject groups on the front cover.

The CURRENT LIST OF MEDICAL LITERATURE is a classified bibliography of medical periodical literature in all languages, which is designed primarily to acquaint the individual physician and research worker with the journals, and the titles of articles currently published therein, that lie within his special fields of interest.

It is also designed to serve as an interim aid to the librarian, pending the appearance of other more comprehensive indexes in the same field, such as the INDEX-CATALOGUE, also published by the Army Medical Library, and the QUARTERLY CUMULATIVE INDEX MEDICUS, published by the American Medical Association, Chicago, Illinois.

The monthly subject indexes to the CURRENT LIST enable both research worker and librarian to find articles on the specific subjects in which they are interested, which have been listed in that month's issues. The subject headings used in these indexes follow, in the main, those of the QUARTERLY CUMULATIVE INDEX MEDICUS, to which the user is referred for the necessary cross references to the desired subject.

The CURRENT LIST is distributed on request, without charge, to any installation, office, officer on active duty, or consultant in the military establishment; any office or officer of the Federal government, for official use (this includes private contractors working under the Research and Development Boards of the Surgeons General in the Military Establishment); and to any private institution or publisher, on exchange or anticipated exchange for any serial publication issued anywhere in the world. Requests should be addressed to the Director, Army Medical Library, Seventh Street & Independence Avenue, S. W., Washington 25, D. C.

All other individuals, institutions and organizations not included in the categories mentioned above may obtain the CURRENT LIST by sending a check or money order for the subscription price (\$3.00 per year, domestic; \$3.75, foreign) to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

---

The CURRENT LIST OF MEDICAL LITERATURE is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: \$3.00 per year (\$3.75 foreign); 10 cents per single copy. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

Published weekly by the ARMY MEDICAL LIBRARY 7th Street & Independence Ave., S. W., Washington 25, D. C., as an intraservice publication of the Department of the Army. Lists all articles of medical interest contained in current journals received. Subject index provided monthly. Exchange invited.
